Supervisor: Dr. Loui Alarabi

OUTLINE

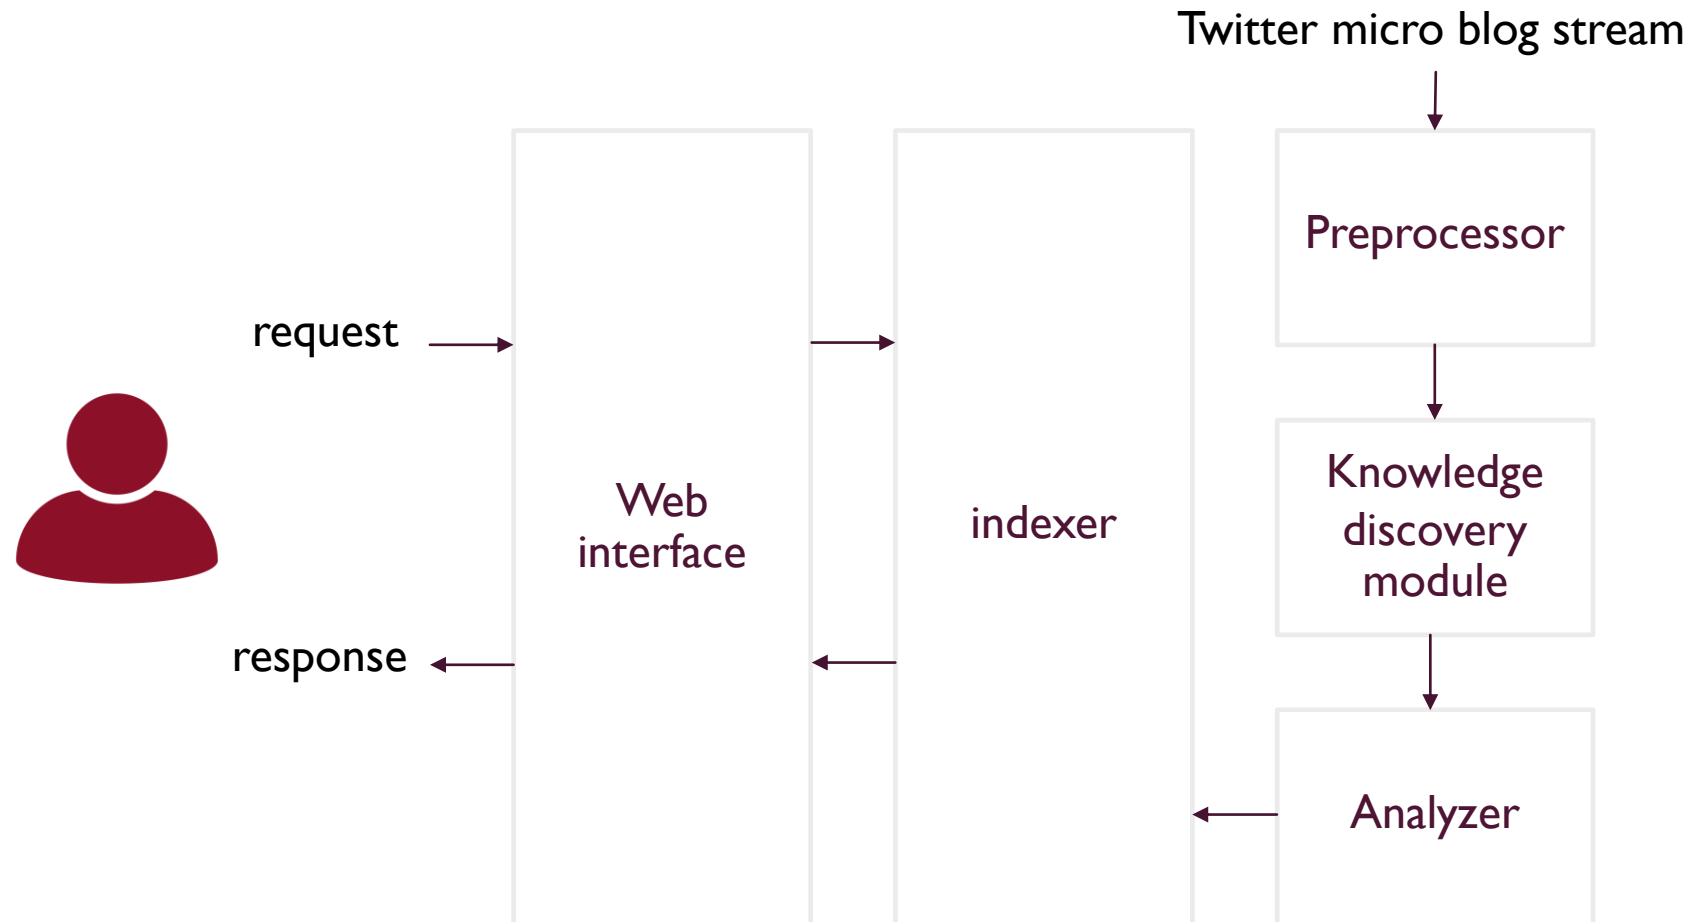

- Introduction.
- System overview.
- Implementation Challenge.
- Demo.
- Conclusion.

INTRODUCTION

- What is Imprint system about?

a capable system to house several method to cluster account, locate hashtag, and show evolution of hashtag to assign a value of these information for level up some aspects of 2030 vision and for information seekers.

SYSTEM OVERVIEW

TOPIC MODELING

LDA:

allocation (LDA) is a generative statistical model that allows sets of observations to be explained by unobserved groups that explain why some parts of the data are similar.

Methodology:

IMPLEMENTATION CHALLENGE

- Dealing with new environment like python and postgres.
- Clean text method suit to the goal of the imprint system.
- Filter data implementation.
- Text classification.

DEMO

Thank you for
listening.
